

ECIS INTERNATIONAL TEACHER CERTIFICATE

an exemplary international qualification for international teachers

The ECIS International Teacher Certificate is designed to equip teachers with the global mind-set necessary for successful teaching in the 21st Century. The ITC is an integrated, standards-based professional development experience assessed by University of Cambridge International Examinations. It requires in-depth critical thinking skills and reflective practice that is learner-centred and based on authentic school-based activity. The ITC is multi-cultural, multi-disciplinary and cutting-edge.

The International Teacher Certificate is based on five standards:

- education in an international context
- teaching competencies for the international educator
- teaching students for whom English is an additional language
- student transition and mobility in international schools
- reflective practice—continuing professional development

"Personally, I applaud the ECIS/Cambridge ITC in that it defines the standards for an 'international' teacher."

Kevin Bartlett, Director, International School of Brussels

"I used to think that what makes a school international is mainly its curricula and intensive foreign language courses. After attending the ITC Institute I have realized that an International School is much more than that."

Zita, in Peru

The ITC has been designed to meet the professional development needs of international educators across the whole school age range and subject areas. The ITC begins with a 3-day institute hosted by international schools worldwide. For more information:
